

SANDERA is one of six projects funded by the European Commission's DG Research promoting 'blue sky' research on emerging issues affecting European science and technology.

The objective of SANDERA is to examine the future relationship between two critical European policy domains: the EU strategy since Lisbon to move towards the European Research Area (ERA) and those EU policies focused on the security of the European citizen in the world.

As a foresight project SANDERA will in particular

- identify drivers of change in the relationship between EU security and defence policies and the ERA;
- develop exploratory scenarios of alternative futures for this relationship;
- analyse the policy implications and develop indicators of change.

The SANDERA team will engage stakeholders throughout the projects. Key activities include workshops, a conference, regular newsletters, and the creation of a website to reach out to the public.

The SANDERA team consists of nine partners: the University of Manchester (UK); Armines (France); Copenhagen Business School (Denmark); Egmont Institute (Belgium); IE HAS (Hungary); IAI (Italy); INGENIO (Spain); SWP (Germany); and the Lund University (Sweden).

If you are interested in the topics of the project please visit us at [www.sandera.net](http://www.sandera.net) or contact Andrew James at [Andrew.James@mbs.ac.uk](mailto:Andrew.James@mbs.ac.uk) or telephone +44 161 275 5860.
