## **THE NUCLEAR RISK LAB: SIMULATION AND POLICY IN PRACTICE**

**November 30, December 2-4**

The Nuclear Risk Lab is a three-day professional training that combines theoretical insight with practical application to explore how nuclear risk has been perceived, managed, and negotiated from the dawn of the atomic age to the present day. A core component of the course is the simulation module developed, "*Dial N for Nuclear – Nuclear Diplomacy and Mystery Game*". In this exercise, participants confront a fictional diplomatic crisis triggered by an unexplained nuclear detonation, acting as diplomats and decision-makers.

# TRAINING PROGRAMME

---

November

30

## Key concepts

02:00pm-3:00pm Participants connection and course introduction  
2:05pm-3:00pm The Birth of the Nuclear Age: Power, Fear, and Risk  
3:00pm-4:00pm Managing the Risk of Nuclear Proliferation  
4.00pm-5:00pm The Risks of Nuclear Testing

December

2

## From Theory to Practice I

02:00pm-03:00pm Managing the Risk of Nuclear Escalation: Arms Control  
03:00pm-04:00pm The Post-Cold War Illusion: from Disarmament Hopes to Renewed Competition  
04:00pm-05:00pm The Politics of Nuclear Risk Today

December

4

## From Theory to Practice II

02:00pm-03:00pm New Technologies, New Risks  
03:00pm-04:00pm Regional Understandings of Nuclear Risk  
04:00pm-07:00pm Simulation "Dial N for Nuclear – Nuclear Diplomacy and Mystery Game"  
19:00-19:10 Concluding remarks
